

James McKenzie MSME PE

James has 35+ years in the Oil and Gas Industry specifically dealing with rotating equipment. He was with ARCO Alaska for 14 years before joining Tern in 2002. He holds both a Bachelors and Master of Science degrees in Mechanical Engineering from the University of Alaska Fairbanks. He is a licensed professional engineer in Alaska, Washington, and Oregon and is currently a senior staff engineer supporting all aspects of rotating equipment on the north slope of Alaska including specifying and commissioning new equipment to maintaining, troubleshooting, and overhauling existing equipment. He has extensive experience with compressor, pump and turbine design and performance analysis.

James was raised in Alaska but currently resides with his family in Washington State
